PROCELL™ MICRONEEDLING - TREATMENT CARE INSTRUCTIONS

Immediately after your Micro-Needling procedure, do not take any anti-inflammatory medications. Such as Ibuprofen, Motrin or Advil. These agents will interfere with the natural inflammatory process that is critical and responsible for your skin rejuvenation.

After your procedure we will apply a rejuvenating serum or skin moisturizer. You do not have to clean your face before bed but if you would like to, only use a gentle cleanser.

Day 1: On the next day, you may clean your face as usual and apply makeup, lotions and other topical products as usual. Stay away from exfoliants or glycolic acids that are present in cleaners as these can make your skin very dry after the procedure. Be sure to use SPF45 or greater sunscreen.

Days 2-7: Within 2 days following your Micro-Needling procedure, you will notice skin dryness with minor flaking. This is due to an increased turnover of skin cells. During this period, you may apply your regular skin moisturizer. Follow the instructions given to you by your skin care professional.

If the procedure is performed around the eyes, you may have a little micro bruising that may exist for three or four days. This can easily be covered with makeup.

Days 7+: A week after the Micro-Needling procedure, most patients notice that their skin is smoother and more radiant.

Results vary, but usually a course of 3-6 treatments is typically recommended to achieve optimal results depending on individual condition and response.

Please call our office should you have any questions or concerns regarding your Micro-needling treatment or aftercare at 626-844-7273 (Tue-Sat 10am-6pm), or email us anytime at reception@parfaire.com.

The entire staff at Parfaire Medical Aesthetics committed to patient education, safety and care.
